DETAILED ACTION

Claims 21-37 are pending in this Office Action. Claims 1-20 were cancelled by the Applicant (15 September 2003).

Reasons for Allowance

The polynucleotides of the Instant Application encode a novel and nonobvious *DR6* receptor similar to a TNF receptor, as confirmed recently by others (see, for example: Schmidt, et al, 2003, J. Exp. Med., 197(1): 51-62). The peptides encoded by the instant claimed nucleic acids were disclosed in the parent Application (now Patent 6,660,839; Deen, et al, 2003). The claims of the instant application are directed to the polynucleotides of SEQ ID NO: 3 and 5, as well as the recombinantly-produced peptides of SEQ ID NO: 4 and 6. The claims are free of the prior art, as the polynucleotides have not been studied in the prior art. The specification provides experimental evidence of utility and enablement under 35 U.S.C. 112, first paragraph. The claims also meet 35 U.S.C. 112- second paragraph requirements because the claims point out and distinctly claim the invention.
